your 🔥 job

SEE IT. BE IT.

QUICK START GUIDE

Five EASY steps to set up an account on Your 🔥 Job

1 Go to *timeforkids.com/your-hot-job*.

2 After watching the Introduction video, click the "Let's Go!" button.

3 Create an account profile by entering *username* (do not use your real name) and *password* using the email of your choice. Then click Submit.

4 Tell us about yourself by answering three quick questions.

5 Complete the Skills Explorer and explore careers.

QUICK START GUIDE

Where you can use Your 🔥 Job at your school

- ✓ Whole or small group teacher-guided lessons

- ✓ Independent student exploration time

- ✓ After school programs

- ✓ Other activities

Common Tips & Troubleshooting on Your🔥Job

- ✓ **Account Creation.** In order for students to create accounts, they must have an email address to use. If students do not have an email address, you can still access all of the content on the industry pages, you just no longer have access to Skills Explorer, recommended careers feed and the ability to earn badges.

- ✓ **Account Management.** Students should not use their real name when creating a username. To help manage class accounts, develop a system to help students remember their usernames and passwords. This can be in the form of recommending a username to be their favorite animal and their favorite number (e.g. hippo4) and their password to be their first grade teacher and favorite number (e.g. singer4) or you may wish to build out a template where students can enter their username and password into a document that only you have access to.

- ✓ **Shared Technology.** For easy access to the platform, have students bookmark *timeforkids.com/your-hot-job* on the browser you prefer class work to be completed on. If students share laptops, be sure to dedicate time at the close of sessions to ask students to log out of their account.
